SUMMARY

Principal Software Engineer with **6+ years of experience building production web applications** using JavaScript and TypeScript.

My primary stack is **TypeScript, JavaScript, React, Next.js, Node.js, and Express**, with experience building backend APIs, database-driven applications, real-time features, dashboards, payment systems, and customer-facing products.

I have worked extensively on **real estate products**, including property investment analytics, property listings, booking systems, property operations, portfolio monitoring, property comparison, and market research.

I have built systems serving **250,000+ users, 100+ enterprise clients, and platforms processing 2M+ daily transactions**. I also have hands-on AWS experience with services including **Lambda, EC2, RDS, S3, API Gateway, and Kinesis**.

I prefer owning a feature or product from the database and API through to the user interface and production deployment, with a focus on writing software that is understandable, maintainable, and reliable.

TECHNICAL SKILLS

JavaScript Ecosystem

Languages: JavaScript · TypeScript

Frontend: React · Next.js · TanStack Query · Zustand · Redux · Tailwind CSS · shadcn/ui

Backend: Node.js · Express · REST APIs · GraphQL · WebSockets

Databases: PostgreSQL · MySQL · MongoDB · Redis

Data & Search: Elasticsearch

AWS

AWS Lambda · EC2 · RDS · S3 · API Gateway · Kinesis

Engineering Tools

Git · GitHub Actions · Docker · Jest · Cypress · Postman · k6 · Grafana · Prometheus · Storybook

Third-Party Integrations

Stripe · Twilio · Resend · Google OAuth · Google Maps · Google Analytics

EXPERIENCE

PRINCIPAL SOFTWARE ENGINEER

Denhunt Ltd · Lagos, Nigeria

2025 – Present

- Built a property management platform for shortlet and hostel businesses using **TypeScript, Next.js, React, PostgreSQL, and Supabase**.
- Built features for **bookings, property availability, payments, expenses, staff management, housekeeping, guest messaging, and subscriptions**.
- Designed the database structure for properties, units, bookings, payments, expenses, staff, and subscriptions.
- Built booking rules at the database level to prevent two customers from booking the same unit at the same time.
- Built a financial transaction system that keeps a history of payments and corrections rather than replacing previous records.
- Built support for businesses managing multiple properties and units.
- Implemented staff permissions so businesses can control what different users can access.
- Built marketplace functionality that uses the same property and availability data as the management platform.

- Built analytics and reporting around bookings, guests, properties, and finances.
- Worked across the application from database and backend API development through frontend implementation and deployment.

Main stack: TypeScript · Next.js · React · Node.js · PostgreSQL · Supabase · TanStack Query · Zustand · shadcn/ui

PRINCIPAL FULL-STACK ENGINEER

ManzillQ · Dubai, UAE

Apr 2026 – Jul 2026

- Built a property investment platform for the Dubai real estate market.
- Designed and developed the application across the **Next.js frontend, Node.js/Express backend, PostgreSQL database, and production infrastructure.**
- Delivered a live platform serving **2,000+ users.**
- Built property investment features including **ROI analysis, property scoring, portfolio monitoring, property comparison, and market research.**
- Built backend APIs using **Express and PostgreSQL.**
- Used **Redis** for caching and WebSockets for real-time updates.
- Built dashboards and data visualisations using **ECharts and Recharts.**
- Integrated Google Maps for property and community information.
- Built server-side PDF generation for investment reports.
- Integrated Stripe, Google OAuth, Twilio, Resend, and Google Analytics.
- Built English and Arabic versions of the application, including right-to-left support.
- Added API validation, rate limiting, security middleware, and production monitoring.
- Worked directly across product development, frontend, backend, database, integrations, and deployment.

Main stack: TypeScript · Next.js · React · Node.js · Express · PostgreSQL · Redis · WebSockets · TanStack Query · Zustand · ECharts · Recharts

LEAD FULL-STACK ENGINEER

PikaGroup Technologies · London, Remote

Jan 2022 – Present

- Lead development of a B2B SaaS platform used by **100+ enterprise clients.**

- Worked across the React/JavaScript frontend, Node.js backend, APIs, databases, and AWS infrastructure.
- Helped move the application from a monolithic structure toward smaller services, reducing infrastructure costs by **35%**.
- Improved dashboard performance by **60%** through changes to rendering, data loading, and frontend code.
- Built real-time analytics functionality using **AWS Kinesis**.
- Built and maintained reusable frontend components using Storybook.
- Reviewed code and mentored junior engineers.
- Worked with the team on application reliability, performance, and production issues.
- Helped maintain a platform processing **2M+ daily transactions**.

Main stack: JavaScript · TypeScript · React · Node.js · AWS · Kinesis · Storybook

FULL-STACK DEVELOPER

DevHeit · London, Remote

May 2019 – Dec 2021

- Worked on an e-learning platform used by **250,000+ users**.
- Built backend APIs using JavaScript and worked on the React frontend.
- Built REST and GraphQL APIs with authentication and user permissions.
- Helped replace an older frontend with React, reducing the codebase by **37%**.
- Built an offline-capable web application that continued working in low-connectivity environments.
- Built CI/CD processes that reduced deployment time by **70%**.

Main stack: JavaScript · React · Node.js · REST · GraphQL

FULL-STACK DEVELOPER

Softnotch · Nigeria

Aug 2017 – Mar 2019

- Worked on a real estate platform containing **40,000+ property listings** and handling **100,000+ daily API requests**.
- Built APIs and frontend features for property listings and bookings.
- Worked on property availability and booking rules.

- Built payment and transaction flows.
- Built image upload and processing using **AWS S3 and Lambda**.
- Built reusable frontend components and landing pages.

Main stack: JavaScript · React · Node.js · SQL · AWS S3 · AWS Lambda

SELECTED PROJECTS

MANZILIQ

Real Estate Investment Platform · Dubai

Built a property investment platform that helps users analyse Dubai properties through investment calculations, property scoring, portfolio monitoring, comparisons, market research, maps, and reporting.

Stack: TypeScript · Next.js · React · Node.js · Express · PostgreSQL · Redis · WebSockets · ECharts · Recharts

DENHUNT

Property Management & Marketplace · Nigeria

Built a property management platform for shortlet and hostel operators covering property management, bookings, availability, payments, expenses, staff, housekeeping, subscriptions, analytics, and marketplace functionality.

Stack: TypeScript · Next.js · React · PostgreSQL · Supabase · TanStack Query · Zustand · shadcn/ui

REAL ESTATE LISTINGS PLATFORM

Property Listings & Booking · Nigeria

Worked on a real estate platform supporting **40,000+ listings and 100,000+ daily API requests**, including property search, availability, bookings, payments, and image management.

Stack: JavaScript · Node.js · SQL · AWS S3 · AWS Lambda

EDUCATION

BSc, Computer Science

University of Lagos · Nigeria

2019 – 2024

CERTIFICATIONS

AWS Certified Solutions Architect – Associate

AWS Certified Developer – Associate

ADDITIONAL

Lagos, Nigeria
