SUMMARY

Full-Stack Engineer with 5 years of experience building production web and mobile systems, including 3+ years in last-mile delivery and online payments. At Send24, engineered Redis geospatial dispatch that cut rider assignment from about 9 minutes to under 1, and live tracking that reduced order-status support tickets by 55% across a network of 1,800+ riders. Core stack: Go, TypeScript, React, Next.js, Node.js, PostgreSQL and Redis.

SKILLS

Core : Go, TypeScript, JavaScript, React, Next.js, Node.js, Express
Mobile : React Native
Data : PostgreSQL, PostGIS, MongoDB, Redis, Prisma, Mongoose, SQL
Payments and integrations: Paystack, Stripe, Google Maps, Auth0, Kinde, Cloudinary, Resend
Infrastructure and tooling: Docker, Kubernetes, Terraform, GitHub Actions, CI/CD, AWS (EKS, Lambda, RDS, S3), Vercel
Messaging : Apache Kafka, RabbitMQ, WebSockets
Testing and observability: Jest, Playwright, k6, Prometheus, Grafana, OpenTelemetry, Sentry
Practices : System design, REST API design, event-driven architecture, idempotency, concurrency, caching, code review, mentoring

EXPERIENCE

Full-Stack Engineer, Send24 (NQB8) | Lagos, Nigeria | 2023 to Present
https://www.send24.co/

- Engineered a Redis geospatial rider-dispatch engine, reducing assignment time from about 9 minutes to under 1 minute.
- Implemented real-time order tracking with WebSockets and Google Maps, contributing to 55% fewer order-status support tickets and clearer delivery visibility.
- Designed dispatch, tracking and settlement services with PostgreSQL and PostGIS, supporting more than 1,800 riders across Lagos, Abuja and Port Harcourt.
- Developed an offline-first React Native rider app with background sync and resilient status updates for unreliable network conditions.
- Implemented OTP verification and photo proof of delivery to strengthen accountability, auditability and dispute resolution.

- Automated cash-on-delivery reconciliation and settlement, improving transaction traceability and reducing manual work.

PROJECTS

Keepsake | Custom phone case store
https://keepsake-nine-tan.vercel.app/

- Built a Next.js and TypeScript case designer that lets customers position and crop uploaded photos to an iPhone case's printable area, with images stored on Cloudinary.
- Secured payment and fulfilment flows with server-side pricing in kobo, Paystack verification through return-page and signed-webhook checks, and conditional order updates that prevent duplicate paid-state transitions and confirmation emails.

EatGo | Food ordering platform for Nigerian restaurants
https://eatgo-client.vercel.app/

- Built a React and TypeScript frontend with an Express, MongoDB and Mongoose API, using Auth0 sign-in and JWT validation on protected routes.
- Integrated server-priced Stripe Checkout in naira with signature-verified payment webhooks, and modelled order status transitions with race-safe automatic cancellation.

LANGUAGES

English (fluent), Yoruba (native)
