

BELLO OLAMILEKAN OLAYINKA

PRINCIPAL SOFTWARE ENGINEER | REAL ESTATE INTELLIGENCE | AI & DATA PLATFORMS

Lagos, Nigeria · +234 905 863 7198 · belloolamilekan661@gmail.com
olamilekan-bello.vercel.app · github.com/Olamilekan-12

PROFESSIONAL SUMMARY

Principal Software Engineer with **6+ years of experience designing, building, and scaling production software and data-intensive platforms** across real estate technology, SaaS, fintech, logistics, and AI-enabled products.

Experienced across **backend architecture, API engineering, database design, distributed systems, analytics, cloud infrastructure, search, real-time systems, and modern frontend architecture**. Proven track record delivering systems serving **250,000+ users, 100+ enterprise clients, and platforms processing 2M+ daily transactions**.

Strong domain experience in **real estate intelligence and property technology**, having built platforms covering property investment analysis, ROI modelling, property scoring, portfolio monitoring, market research, property comparison, property operations, availability, and booking systems.

At ManzillQ, independently designed and delivered a **Dubai real estate investment intelligence platform from the ground up**, working across architecture, backend, data, analytics, frontend, integrations, and production infrastructure. Earlier, built APIs and booking infrastructure for a real estate platform managing **40,000+ property listings and 100,000+ daily API requests**.

Experienced with **AWS, PostgreSQL, MySQL, MongoDB, Redis, Elasticsearch, Kinesis, microservices, REST/GraphQL APIs, and real-time systems**, with a strong focus on building reliable platforms around complex business data.

CORE ENGINEERING EXPERTISE

Software Architecture: System Architecture · Distributed Systems · Microservices · Event-Driven Systems · API Architecture · Scalability · Reliability

Backend Engineering: Node.js · Express · Python · Django · FastAPI · Go · REST · GraphQL · WebSockets

Microsoft Ecosystem: C#

Data Engineering: PostgreSQL · MySQL · MongoDB · DynamoDB · Redis · Elasticsearch · Database Design · Data Modelling · Analytics Pipelines

AI & Intelligent Applications: AI-enabled Applications · AI-powered Products · Data Analytics · Search & Retrieval · Conversational Product Architecture

Cloud & Infrastructure: AWS · Lambda · EC2 · RDS · S3 · API Gateway · Kinesis · Docker · Kubernetes · Terraform · CI/CD

Frontend: React · Next.js · TypeScript · TanStack Query · Zustand · Redux · Tailwind CSS · shadcn/ui

Production Engineering: Performance Engineering · Security · Observability · Monitoring · Testing · Production Operations

PROFESSIONAL EXPERIENCE

PRINCIPAL SOFTWARE ENGINEER

Denhunt Ltd · Lagos, Nigeria

2023

Lead engineering for a property technology platform serving shortlet and hostel businesses, working across system architecture, backend services, data modelling, frontend systems, infrastructure, and production delivery.

- Architected a property operations platform around **PostgreSQL and Supabase**, placing critical business invariants at the database layer.

- Designed and implemented core systems for **property management, bookings, unified availability, payments, expenses, staff management, housekeeping, guest messaging, and subscription billing.**
 - Designed a single-source-of-truth data architecture connecting operational property records with marketplace functionality.
 - Implemented database-level booking constraints to prevent double-booking scenarios structurally.
 - Modelled financial transactions as an append-only ledger, preserving historical records and auditability.
 - Designed property and hostel inventory models supporting **individual units, bed spaces, session-based occupancy, and installment payments.**
 - Implemented role-based access control supporting multi-property businesses and operational teams.
 - Built subscription infrastructure supporting businesses managing **5–100 units.**
 - Designed and implemented analytics and operational reporting around property, booking, guest, and financial data.
 - Took the platform from initial architecture through implementation, deployment, administration, permissions, marketplace functionality, and subscription infrastructure.
 - Produced technical specifications covering architecture, data models, workflows, administration, and product systems.
-

PRINCIPAL FULL-STACK ENGINEER

ManzillIQ · Dubai, UAE

Apr 2026 – Jul 2026

Designed, built, and deployed a real estate investment intelligence platform serving the Dubai property market, with responsibility spanning architecture, backend, data, analytics, frontend, integrations, and production infrastructure.

- Designed and delivered the complete platform from the ground up across **backend architecture, frontend systems, data models, analytics, integrations, and infrastructure.**
- Delivered a live platform serving **2,000+ users** in the Dubai property market.
- Contributed to a **70% increase in company revenue** through platform delivery and expansion.

- Designed backend services using **Express and PostgreSQL**, with **Redis caching** and WebSocket-based real-time communication.
- Built real estate intelligence capabilities covering **ROI analysis, property scoring, portfolio monitoring, property comparison, and market research**.
- Designed data-heavy analytical interfaces using **ECharts and Recharts**.
- Integrated geographic property and community analysis using **Google Maps**.
- Implemented server-side generation of investment and analytical reports.
- Integrated **Stripe, Google OAuth, Twilio, Resend, and Google Analytics**.
- Implemented English and Arabic localisation, including full right-to-left support.
- Hardened APIs through **rate limiting, request validation, security middleware, and operational monitoring**.
- Established production alerts and analytics reporting to improve platform visibility and operational response.

Key domain: Real Estate Intelligence · Investment Analytics · Property Data · Market Research · Portfolio Analytics

LEAD FULL-STACK ENGINEER

PikaGroup Technologies · London, Remote

Jan 2022 – Present

Lead engineering for a B2B SaaS platform serving **100+ enterprise clients** and **processing 2M+ daily transactions**.

- Led engineering across **backend, frontend, infrastructure, architecture, and data systems**.
- Designed and led migration from a monolithic application to **serverless microservices**, reducing infrastructure costs by **35%**.
- Designed scalable application architecture supporting high-volume transaction processing.
- Implemented **real-time analytics pipelines using AWS Kinesis**.
- Improved dashboard performance by **60%** through server-side rendering, memoisation, dynamic imports, and frontend architecture improvements.
- Contributed to architecture decisions covering **scalability, reliability, observability, performance, and production operations**.
- Led adoption of a component and design system using Storybook and atomic design, reducing interface inconsistencies by **40%**.

- Mentored 5+ engineers and established structured code-review and engineering practices.
-

FULL-STACK DEVELOPER

DevHeit · London, Remote

May 2019 – Dec 2021

Worked on an AI-powered e-learning platform supporting **250,000+ users**, with responsibility across backend APIs, frontend architecture, infrastructure, and reliability.

- Built backend systems supporting a large-scale AI-powered product.
 - Designed and implemented **REST and GraphQL APIs** with secure authentication and authorisation.
 - Worked on application architecture supporting a high-volume user base.
 - Refactored a legacy frontend into React, reducing codebase size by **37%**.
 - Implemented an offline-first PWA architecture achieving **99.5% uptime**.
 - Designed CI/CD pipelines that reduced deployment time by **70%**.
-

FULL-STACK DEVELOPER

Softnotch · Nigeria

Aug 2017 – Mar 2019

Worked on a real estate platform managing **40,000+ property listings** and **100,000+ daily API requests**.

- Built backend APIs supporting large-scale property listing and retrieval workloads.
- Designed complex **property availability and booking workflows**.
- Implemented secure payment and transaction processing.
- Built image upload and optimisation infrastructure using **AWS S3 and Lambda**.
- Developed reusable frontend components and dynamic interfaces, contributing to an **18% improvement in conversion**.

SELECTED REAL ESTATE & INTELLIGENCE PROJECTS

MANZILIQ

Real Estate Investment Intelligence · Dubai

Designed and built a property intelligence platform enabling users to analyse Dubai real estate through **ROI analysis, property scoring, portfolio monitoring, property comparison, market research, geographic analysis, and investment reporting.**

Technology: Next.js · TypeScript · Express · PostgreSQL · Redis · WebSockets · ECharts · Recharts · Google Maps · Stripe

DENHUNT

Property Technology & Operations Platform · Nigeria

Designed and engineered a property operations platform connecting operational property data with bookings, availability, financial management, staff operations, analytics, and marketplace functionality.

Technology: PostgreSQL · Supabase · Next.js · TypeScript · React · TanStack Query · Zustand · shadcn/ui

REAL ESTATE LISTINGS & BOOKING PLATFORM

Property Data & Transaction Infrastructure

Built APIs and booking infrastructure supporting **40,000+ property listings and 100,000+ daily API requests**, including property availability, booking workflows, and transaction processing.

Technology: APIs · SQL · AWS S3 · AWS Lambda

TECHNICAL STACK

Backend & Application Development

Node.js · Express · Python · Django · FastAPI · Flask · Go · C# · REST APIs · GraphQL · WebSockets · Microservices

Databases

PostgreSQL · MySQL · MongoDB · DynamoDB · Redis · Database Design · Data Modelling · Query Optimisation · Row-Level Security

Search & Data Systems

Elasticsearch · Redis · AWS Kinesis · Analytics Pipelines · Search Systems · Data Retrieval · Business Intelligence

Cloud & Infrastructure

AWS · Lambda · EC2 · RDS · S3 · API Gateway · Kinesis · Docker · Kubernetes · Terraform · Vercel · GitHub Actions · Jenkins

Frontend

React · Next.js · TypeScript · JavaScript · TanStack Query · Zustand · Redux · Tailwind CSS · shadcn/ui · Vue.js · Nuxt

AI & Intelligent Applications

AI-powered Applications · AI Product Development · Conversational Interfaces · Data-driven Applications · Analytics · Search & Retrieval

APIs & Integrations

Stripe · Twilio · Resend · Google OAuth · Google Maps Platform · Google Analytics Data API · Slack API

Testing & Observability

Jest · Cypress · Pytest · Go Test · k6 · Artillery · Postman · Prometheus · Grafana

Engineering Practices

System Architecture · Distributed Systems · Performance Engineering · Security · Observability · CI/CD · Design Systems · Technical Leadership · Agile · Jira

EDUCATION

BSc, Computer Science

University of Lagos · Nigeria

2019 – 2024

CERTIFICATIONS

Meta Front-End Developer

Google UX Design
