■ Fullstack Software Engineer | React.js | Next.js | Node.js | Python | AWS | Scalable Systems

Portfolio: <https://olamilekan-bello.vercel.app/>

Professional Summary

Results-driven Fullstack Software Engineer with 6+ years of experience designing and delivering high-performance, scalable applications. Adept at both backend architecture (Node.js, Python, Go, AWS) and frontend development (React.js, Next.js, TypeScript, TailwindCSS), with a proven track record of building products that serve thousands of users. Experienced in microservices, cloud-native infrastructure, UI/UX optimization, and leading cross-functional teams. Passionate about clean code, system performance, and solving complex business problems with technology.

Core Skills & Tools

Frontend: React.js, Next.js, Redux, TypeScript, JavaScript (ES6+), TailwindCSS, Styled-Components, SCSS, Vue.js, Nuxt

Backend: Node.js, Express.js, Python (Django, FastAPI, Flask), Go, REST/GraphQL APIs, Microservices

Databases: PostgreSQL, MongoDB, DynamoDB, MySQL, Redis, Elasticsearch

Cloud & DevOps: AWS (Lambda, EC2, RDS, S3, API Gateway), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins

UI/UX & Tools: Figma, Adobe XD, Storybook, WCAG Accessibility, Jira, Agile, Notion

Testing & Monitoring: Jest, Cypress, Pytest, Go Test, Postman, k6, Artillery, Prometheus, Grafana

Professional Experience

Lead Fullstack Engineer

PikaGroup Technologies, London (Remote) — Jan 2022 – Present

- Spearheaded development of a B2B SaaS platform serving 100+ enterprise clients, processing 2M+ daily transactions.
- Designed and migrated architecture from monolith to serverless microservices, reducing infrastructure costs by 35%.
- Built and optimized frontend dashboards, cutting load times by 60% through SSR, memoization, and dynamic imports.
- Led design system adoption with Storybook + Atomic Design, reducing inconsistencies by 40%.
- Mentored 5+ junior developers across frontend and backend, introducing code review processes and best practices.
- Implemented real-time data pipelines with AWS Kinesis, improving analytics capabilities.

Fullstack Developer

DevHeit, London (Remote) — May 2019 – Dec 2021

- Built scalable backend for an AI-powered e-learning platform supporting 250,000+ users.
- Developed REST and GraphQL APIs with secure authentication/authorization.
- Refactored legacy frontend into React, reducing codebase size by 37%.
- Implemented offline-first PWA architecture, achieving 99.5% uptime in low-connectivity regions.
- Designed CI/CD pipelines, reducing deployment time by 70%.

Fullstack Developer

Softnotch, Nigeria — Aug 2017 – Mar 2019

- Built APIs for real estate platform handling 40,000+ listings and 100,000+ daily API calls.
- Implemented image upload and optimization with AWS S3 & Lambda.
- Designed booking system with complex business logic and secure payment workflows.
- Built dynamic landing pages and custom UI components, improving conversion rates by 18%.

Selected Projects

- CloudSync Enterprise – Multi-tenant file management system with real-time sync and workspace isolation. (Go, AWS)
- SpendSavvy Dashboard – Fintech dashboard with budgeting insights and charts. (Next.js, Recharts, Context API)
- LogiTrack – Supply chain system with predictive analytics and real-time tracking. (Go, Microservices, ML)
- Onboardly HR Portal – HR onboarding tool with Google SSO and animated onboarding journeys. (React, Framer Motion)

Education

Bachelor of Science (B.Sc), Computer Science
University of Lagos, Nigeria — 2019 – 2024

Certifications

- AWS Certified Solutions Architect – Associate
- AWS Certified Developer – Associate
- Google Cloud Professional Cloud Architect
- Docker Certified Associate
- Certified Kubernetes Application Developer (CKAD)
- Meta Front-End Developer Certificate – Coursera
- Google UX Design Certificate – Coursera

Key Achievements

- Scaled systems from 10K to 2M+ daily users with distributed architectures.
- Reduced API response times by 75% with caching & query optimization.
- Cut page load times from 7.2s to 1.9s through performance optimization.
- Successfully led 4+ system migrations (backend + frontend).
- Increased retention by 23% through better UI/UX and dashboard optimizations.

What I Bring to Your Team

- End-to-End Expertise: From system design and cloud deployments to polished frontend UI/UX.
- Scalability & Performance: Building systems that handle millions of requests and optimized interfaces that delight users.
- Team Leadership: Mentoring engineers, setting best practices, and aligning development with business goals.
- Product-Oriented Thinking: Every line of code drives value, user satisfaction, and measurable

KPIs.
